

MAY 2022

Joel Rubin

I'm a surgeon and emergency medicine physician. I began wood turning about 20 years ago. For the past 2 years I've been president of the GTW club. I've taken lessons from a variety of people over the years but my biggest influence was Bin Pho. He taught me how to make thin turnings along with airbrushing and piercings.

I now do a variety of turnings not sticking with any one form or style.

Over the past year I've been intrigued with making acrylic paperweights with various objects imbedded in them.

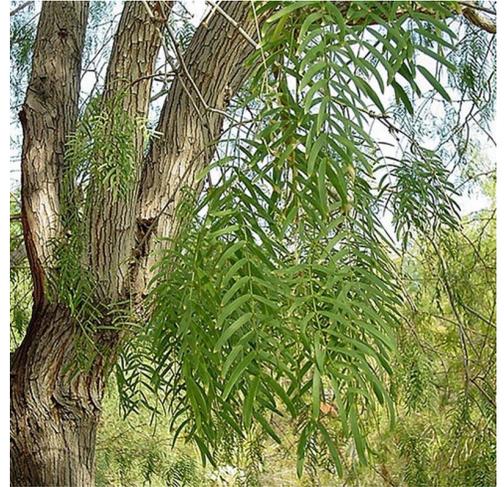

I will demonstrate how to make these.

Wood of the Month

Honey Mesquite

Honey Mesquite is a prize for Woodturners especially those that do segmenting due to its exceptional stability. It has little movement so is unlikely to crack. It typically has straight to wavy grain though is known for knots and defects which lend to its unique and beautiful look. It glues, turns, and finishes well with a reddish brown heartwood that darkens as it ages. It has a medium to coarse texture as well as open pores. It is also well known for smoking meats which is a great way to use up scraps!

Tana's Challenge

1. You live in a one story house made entirely of redwood. What color would the stairs be?
2. I am taken from a mine, and shut up in a wooden case, from which I am never released, and yet I am used by almost everybody. What am I?
3. I went into the woods and got it. I sat down to seek it. I brought it home with me because I couldn't find it. What is it?
4. When is a piece of wood like a King?
5. As I went across the bridge, I met a man with a load of wood which was neither straight nor crooked. What kind of wood was it?
