

September Virtual & Live Meeting

Kevin Bassett

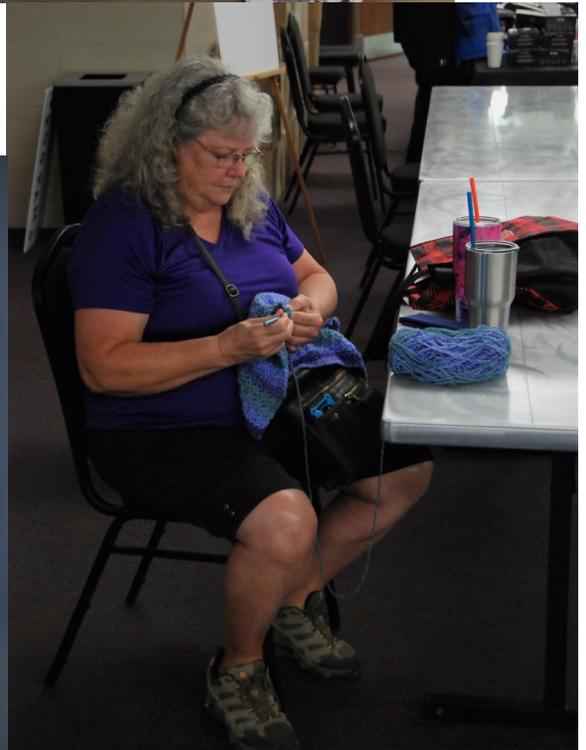

Kevin is a Certified Arborist and has worked with trees since 1975. He began Wood Turning in 1992 on a small Sears lathe. Like many turners Kevin started with small projects like pens, candle sticks and bud vases, ultimately evolving to larger and more complex projects. In 2007 Kevin represented the DAW at the “Master’s at Work” competition in Broken Bow, Oklahoma winning first place in the inaugural competition. Kevin has demonstrated numerous times at most of the Woodturning clubs in North Texas. He has also been a demonstrator several times at SWAT. Kevin’s work has exhibited in various galleries in Arizona, Colorado, Texas, and Arkansas. Kevin is a member of the Dallas Area Woodturners and the American Association of Woodturners. Much of Kevin’s work is with native woods collected from job sites where he is working on trees. Much of Kevin’s best artistic work is made to show the inner beauty of trees by utilizing natural edges, voids, and spalting to artistic advantage. As a turner Kevin has diverse skills and takes on architectural spindle turning and antique repair.

SWAT

I hope many of you were able to attend SWAT this year. It was fantastic with excellent demos as well as great vendors! The gallery had work that was out of this world! I know I can't wait to try out some of the techniques I learned and imagine y'all are probably already working on something new and amazing! Our own Gary B won an amazing segmented hollow vessel made by Gerald Fields. I won a beautiful hollow form turned by Jim Johnson and embellished by Rick Cannon. Neal Brand had this creative (I think its adorable) cheese board but the mice got to it first! Several of the ladies enjoyed some fiber arts, making some nice pieces while waiting for demos to finish. Overall, it was a great experience and I'm already looking forward to next year!

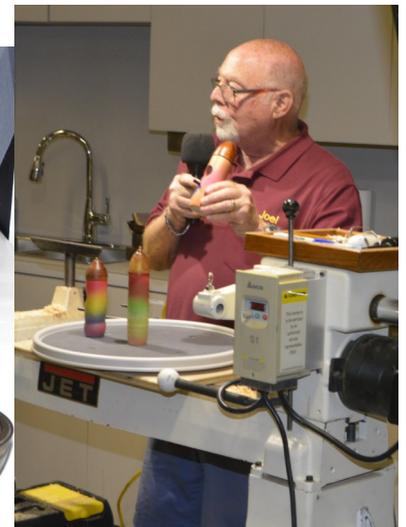

August Demo

Last month, we had a great demo on making duplicate objects by Brian Evans. He did an excellent job of explaining the best methods to achieve this and mistakes to avoid. We also had some very nice show and tell items from our members. We have quite a talented group here!

Mesquite

I think most Texans are familiar with this type of wood... Mesquite! Its reddish color is well known and its also popular for having knots and cracks which pop when accented or filled with turquoise. Its quite an iconic look and when seen makes most think of Texas.

It is a very durable wood that is easy to turn unless it has knots but is well worth the extra effort to turn with them. It glues, turns, and finishes beautifully. Though it doesn't have a major odor when turning, I know there are some of us that enjoy using it to smoke meat to give it some amazing extra flavor.
